zenith

VN1ANTA20

Designed For HDTV

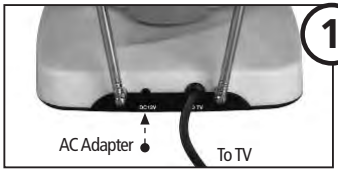
VHF/UHF
TV Antenna

Digital and Analog Compatible

Amplifier boosts signal strength for increased picture quality

Receives local HD and Digital TV broadcast signals for free
Adjustable VHF dipoles extend up to 39" to improve reception for channels 2-13
UHF loop for improved reception of channels 14-69
Blue power indicator light
High gain and low noise booster
Adjustable wide band amplifier
Receives horizontal and vertical signals
Includes power adapter and 58" coax cable

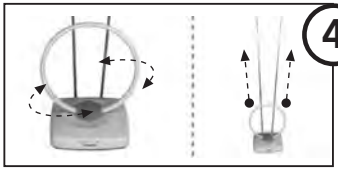
Installation



Power Connection
- Plug AC adapter into DC12V jack on back of antenna

Connect to Analog TV
- Connect coaxial cable connector to TV's RF input.

Turning Antenna On/Gain Adjustment
- Turn antenna ON by rotating Min/Max switch.
  Adjust Gain Control for best reception



Adjust Antenna
- Rotate and adjust hoop to improve UHF reception
- Extend and move dipoles to improve VHF reception

Note:
Do not use antenna during thunderstorms. Turn off power.
Turn off power when not in use.
If antenna is not receiving correctly, try placing in different position.

Reception Frequency: VHF (47~230MHz) / UHF (470~860MHz)
BLOWN-UP Gain: VHF (15db) / UHF (20db)
Impedance: 75 Ohm
VSWR: 2

VN1ANTA20

VHF/UHF
Antenne TV

Compatibilité analogique et numérique

L'amplificateur augmente la force du signal pour une plus grande qualité de l'image

Réception gratuite de signaux de diffusion TV numérique et HD locaux

Doublets VHF réglables et extensibles jusqu'à 1 m (39 po) pour améliorer la réception des chaînes 2 à 13

Boucle UHF pour améliorer la réception des chaînes 14 à 69

Voyant d'alimentation bleu

Amplificateur à gain élevé et faible bruit

Amplificateur large bande réglable

Réception de signaux horizontaux et verticaux

Inclut un adaptateur d'alimentation et un câble coaxial de 1,4 m (58 po)

VHF/UHF
Antena de TV

Compatible con señales digitales y análogas

El amplificador refuerza la potencia de la señal para optimizar la calidad de la imagen

Recibe señales de transmisión de TV digital y de alta definición locales gratis

Los dipolos VHF ajustables se extienden hasta 39 pulg. para mejorar la recepción de los canales 2 a 13

Bucle UHF para mejorar la recepción de los canales 14 a 69

Luz indicadora de potencia azul

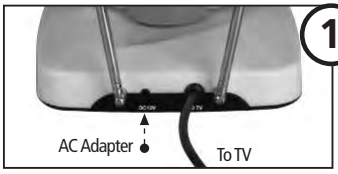
Reforzador de alta ganancia y ruido bajo

Amplificador de banda ancha ajustable

Recibe señales horizontales y verticales

Incluye adaptador de potencia y cable coaxial de 58 pulg.

Installation/Installation



Power Connection
- Plug AC adapter into DC12V jack on back of antenna

Power Connection
